Minggu Wang

AI Researcher · Kyushu University

wangminggu@outlook.com | minggu.wang | Fukuoka, Japan

PROFILE

I study how AI systems generate, perceive, and fail - from quantum code generation to image editing and autonomous-driving robustness. My work connects benchmark design, generative methods, and system-level testing through measurable and reproducible evaluation.

RESEARCH AREAS

AI for Software Engineering
Executable and semantic evaluation of generated programs.

Generative Vision
Controllable image editing with identity and structure preservation.

Robustness & Evaluation
Testing model failures and downstream system consequences.

PUBLICATIONS

Improving Robustness of Semantic Segmentation for Autonomous Driving: A Case Study
Minggu Wang, Zhiyong Zhou, Fuyuan Zhang, Jianjun Zhao, and Vinh Truong Duy Truong
AITest 2026, pp. 156-163 · doi:10.1109/AITest70988.2026.00032

QuanBench: Benchmarking Quantum Code Generation with Large Language Models
Xiaoyu Guo, **Minggu Wang**, and Jianjun Zhao
ASE 2025, pp. 2657-2669 · doi:10.1109/ASE63991.2025.00218

Zero-shot Face Editing via ID-Attribute Decoupled Inversion
Yang Hou, **Minggu Wang**, and Jianjun Zhao
ICME 2025, pp. 1-6 · doi:10.1109/ICME59968.2025.11209805
